Subject: UVM Chilled Water System Filling

All,

On Thursday 26 May, 2016 UVM will be filling the campus chilled water system. This will be approximately 13,000 gallons of water and could cause the water to become discolored. If this should happen, please let the cold water run for several minutes, this will help clear your water. Prior to this UVM/BPWD will isolate valves within the First Year Housing construction site to minimize the disturbance to the UVM MC complex.
